

ORION BELT

Description:

The Orion Belt provides the benefits of LED lighting in a unique, fully encapsulated and flexible design. Narrow beam spread LED's are mounted 3/4" on center to achieve maximum luminous intensity. The encapsulation is transparent UV stabilized PVC, suitable for wet locations and is pressure resistant to 100kg/2.5m². Orion Belt is flexible down to a 10" radius allowing mounting in any configuration. The solid-state light source and extended operating life allows for little or no maintenance in difficult to access environments. Orion belt ships factory cut to specified length based on cut intervals.

Technical Specs:

D.C. LED drivers and power feed required.
 Power consumption: 1.5W per ft. (blu, grn, wht); 1.0W per ft (red, amber)
 Max. Length: 200ft (blu, grn, wht); 300ft (red, amber)
 Min Cut Intervals: 4.5" (blu, grn, wht); 9" (red, amber)
 Operating temperature between -4F through 140F

Part Numbers:

135401	LED white
135401-1	LED warm white
135402	LED blue
135403	LED green
135404	LED red
135405	LED amber
