

◀ Luceplan - Agave

Light, matter and color dialogue with each other by means of contrasts of transparency, reflection, refraction and diffusion. Transparent methacrylate ribs create elliptical, spheric, parabolic forms and cover the lighting source avoiding dazzle, without losses of luminous efficiency.

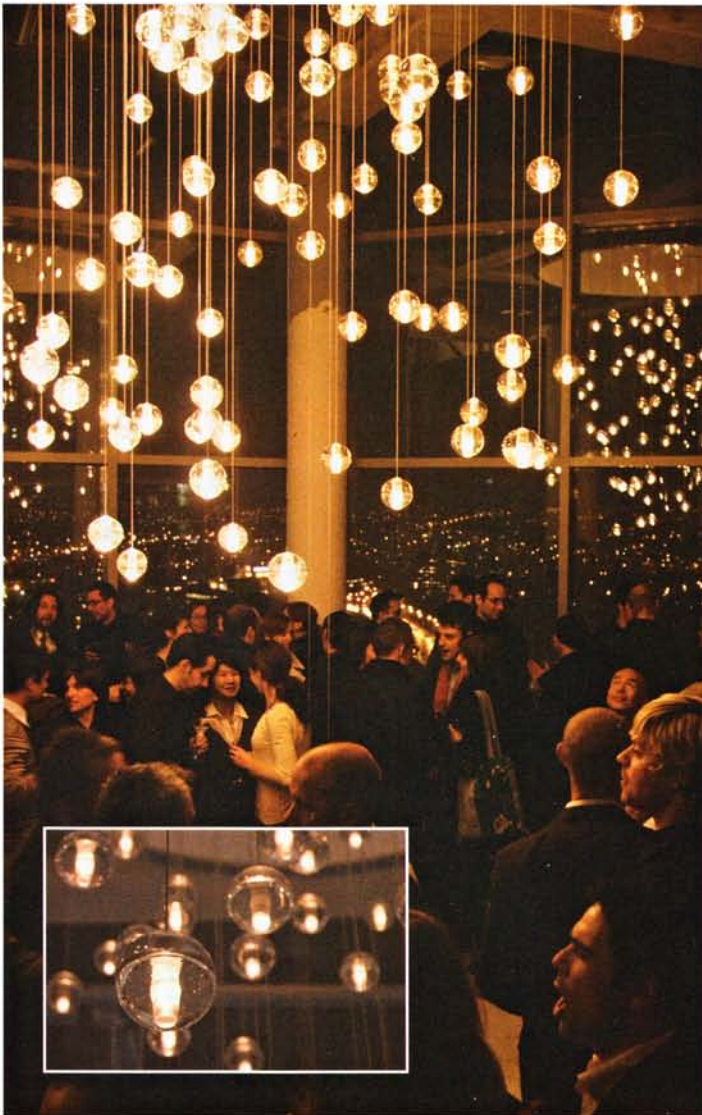

▼ Bocci

The 14 series by Omer Arbel is designed for clustering—the effect being of many tiny candles encased in floating spheres of water. Comprising 25 cast glass pendants connected with braided coaxial metal cable to a white powder coated canopy.

▲ Axo Lighting

Large suspension piece by Axo Lighting designer Manuel Vivian. Axolights philosophy of quality and design is manifested through a constant search for innovative materials and design.

◀ Foscarini - Caboche

Suspension lamp composed by transparent globes made of polymethylmetacrylate. A shade in white matt finish glass offers direct upward and downward light projection and diffusion throughout the space
