

# Plass grande, suspension design Luca Nichetto 2011

FOSCARINI

**Plass** - the name is a synthesis of “plastic” and “glass” – interprets the millennia-old artisan tradition of glass making, in the light of a contemporary process and material: rotationally-moulded transparent polycarbonate. Thanks to this technology, which is not yet widely used in the lighting sector, the finishes are not cold and impersonal, but feature slight irregularities, highlighted by the light source, as in handmade glass. The colours chosen for the diffuser – aquamarine and grey – are inspired by Murano glass and venetian craftsmanship. As

well as evoking an atmosphere and an emotion, the color helps define the shape of the lamp, highlighting the thickness of the incisions on its surface. Suspended between memory and modernity, Plass characterises large spaces, including high ones, alone or in multiple compositions.

# Plass grande, suspension technical info

**FOSCARINI**

**Description**

Suspension lamp with diffused and direct light. The large transparent polycarbonate diffuser is achieved using rotational moulding, a technique which makes it possible to create hollow bodies of geblackus sizes without the need for any welding. Brushed aluminum internal mount, stainless steel suspension cable and transparent electrical cable. Ceiling rose with galvanised metal bracket and glossy chromed metal cover.

**Materials** Rotational moulded polycarbonate and aluminium

**Colors** blue, grey

**Brightness light**  
semi-diffused and direct down light
