Serena T - Specification Sheet by Patricia Urquiola, 2015

Mounting	Table Top
Lamp (Bulb) Description	1 LED 2700K 1100lm CRI90 13W Dimmer
Environment	Indoor - Dry Location
Finish	Black

● F6582030 Black

Technical and Product Description At first glance, Serena appears to be in motion—it is a leaf blown by a gentle breeze, dancing through a current of wind. Inspired by the simple beauty of nature, this piece features a dynamic reflector that can be directed to obtain an intense, precisely reflected light. The structure of the lighting body reduces the LED source's visual impact, providing the user with a level of comfort that belies the design's superior technology.

The Serena is an adjustable lamp that provides indirect and reflected light. It features an extruded aluminum heat sink, photoengraved black polycarbonate (PC) cut-off, and a photoengraved optical Polymethyl methacrylate (PMMA) diffuser. The reflector is sheared and folded pre-anodized aluminum.

The power cord measures 200 centimeters, and a dimmer switch provides ON-OFF functions and 10-100% light adjustment. The plug-in power supply includes interchangeable plugs.

Inspiration behind the design:

Artist Patricia Urquiola drew inspiration for Serena from the natural world —leaves in different shapes and colors became its playful diffusers, reflecting light or allowing it through. "It is a light that's domestic in nature," she says, "It wants to fit in."

Electrical

Voltage	100-240V
Switching	Dimmer switch that provide ON-OFF functions and 10-100% light adjustment with memory
IP Rating	IP20

Physical

Cord Length (inches)	78.74" Black
Construction Material	Aluminum, Polycarbonate
Weight	2.76 lbs
